

EHR Integration

BardyDx EHR: Integration Made Simple

Improve workflow efficiency to increase staff satisfaction and accelerate patient care with the BardyDx EHR integration service.

Better patient care with diagnostic cardiac data integrated into your EHR

Integrate the BDx CAM solution into your EHR to accelerate time to patient diagnoses and enable more comprehensive treatment plans based on all relevant patient data.

Simplified and automated workflow for greater efficiency

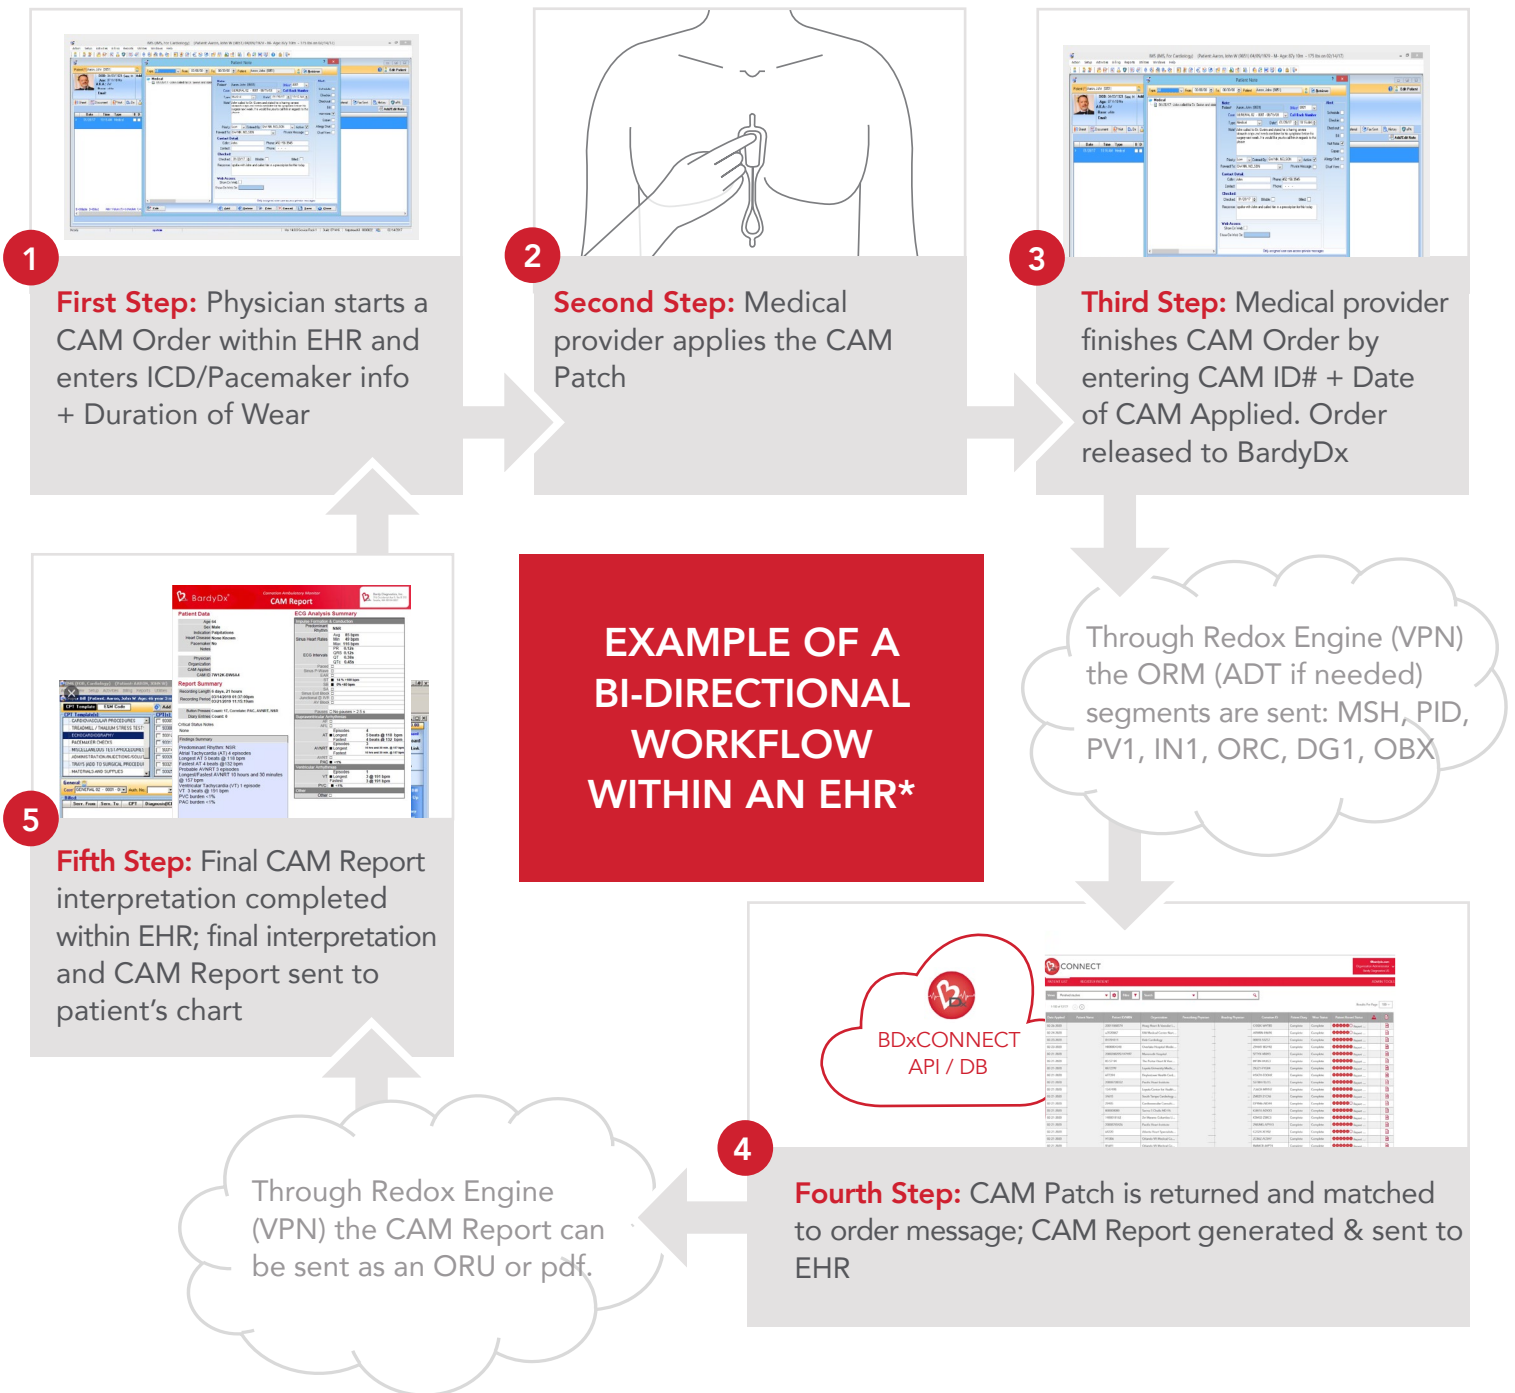

Save on time and cost, and reduce administrative burden by **ordering CAMs and receiving them directly through your EHR**. The right information all in one place further reduces manual data entry and risk of errors.

BDx EHR Integrations Compatible with any EHR or CVIS

- EPIC
- Cerner
- athenahealth
- Allscripts
- NextGen
- eClinicalWorks
- Medent
- MUSE
- Epiphany
- PaceMate
- MURJ
- Infinitt

HOW BARDYDX EHR INTEGRATION WORKS

BardyDx EHR Integrations are offered as bi-directional or reports-only configuration, using HL7 or API standards with secure connectivity to a cloud-based environment.

*Based on BDx EHR integration with BDx customers. Actual workflow may vary depending on customer's system, IT, and organization requirements.

Indications for Use: The Carnation Ambulatory Monitor is designed to provide extended duration cardiac monitoring for people who are suspected of having cardiac arrhythmias. Please refer to the Instructions for Use for further information.
